1-1 Laptop Program

Cavendish Road State High School is committed to aiding students and staff in creating a 21st Century learning environment. We recognise the importance, and indeed, the pervasion of technology in our everyday lives.

As we prepare students for life in the 21st Century we must equip them with the skills to utilise technology responsibly and empower them for lifelong learning. Cavendish Road State High School is committed to moving students forward in a 21st Century learning environment. Our school's Administration Team continues to provide through the Student Resource Scheme, each child with a laptop. A laptop in the hands of every student extends and enriches learning by:

- Shifting instruction towards more student centred learning, where inquiry and authentic learning is emphasised.
- Focusing on 21st Century Learning, including critical and creative thinking, collaboration, communication, self-direction, global awareness and cultural awareness.
- Using online learning tools and digital content.
- Increasing student engagement through ICTs.

At Cavendish Road State High School, technology is a tool that enhances pedagogy and allows differentiation in learning. Teachers as life-long learners, will continue to focus on developing their technological, pedagogical and content expertise; utilising ICT in an educationally purposeful way.

Technology facilitates the creation and sharing of knowledge. It provides the extensive ability to share information locally and globally. By utilising virtual classrooms and online learning environments, students can research, collaborate, present, create, refine and represent knowledge in contemporary and meaningful ways. 1:1 access to appropriate technology allows students to transition seamlessly, the learning from school to home and in between. It provides opportunities for students to be challenged by tasks that were once inconceivable: truly transforming learning; and preparing students to be the innovators, entrepreneurs and digital leaders of tomorrow.
